CANNABIS HEALING

CANNABIS HEALING

2026 Growth Roadmap

Prepared by Roviq • Randy Torres • randy@roviqai.xyz • February 2026

1. Where We Are Today

Cannabis Healing launched delivery operations in July 2025. In just seven months, the business has generated $228K in total revenue across nearly 7,000 orders. Here's the current state of the business based on actual sales data.

Total Revenue (7 mo)	Total Orders	Avg Order Value	Jan Trend
$228,081	**6,920**	**$32.96**	**$1,400/day ↑**

Monthly Revenue Trend

Month	Revenue	Orders	Avg/Day	Orders/Day	AOV
*Jul 2025**	$17,844	425	$776	18.5	$41.98
Aug 2025	**$40,669**	1,139	$1,312	36.7	$35.71
Sep 2025	$36,432	1,081	$1,214	36.0	$33.70
Oct 2025	$37,540	1,141	$1,211	36.8	$32.90
Nov 2025	$31,692	1,115	$1,093	38.4	$28.42
Dec 2025	$33,518	1,087	$1,117	36.2	$30.84
Jan 2026	$30,387	932	$1,125	34.5	$32.60

July was a partial month (launched mid-month). August peak includes a $4,885 single-day event.

January Momentum: Week-Over-Week Growth

While January's monthly average looks flat, the weekly trend tells a different story. Revenue grew 48% from the first week to the last, and AOV climbed 19%.

Week	Revenue	Avg/Day	Orders	AOV	Growth
Week 1 (Jan 1–7)	$6,627	$947	216	$30.68	—
Week 2 (Jan 8–14)	$7,228	$1,033	244	$29.62	+9%
Week 3 (Jan 15–21)	$8,110	$1,159	242	$33.51	+12%
Week 4 (Jan 22–28)	**$8,422**	**$1,404**	230	**$36.62**	**+21%**

Key Takeaway: The business is accelerating. Late January's $1,400/day run rate, if sustained, puts CH at ~$42K/month — a 20% jump from the previous plateau. This is the moment to add fuel.

2. What the Data Tells Us

Category Breakdown

Flower dominates at 63% of revenue. Edibles are significantly underweight at 7% versus the industry average of 15–20%. This represents a clear expansion opportunity.

Category	Revenue	Share	Orders	Opportunity
Flower	$142,925	**62.7%**	10,090	Stable core
Vaporizers	$35,611	15.6%	752	Maintain
Pre-Rolls	$24,123	10.6%	2,914	Traffic driver
Edibles	$16,552	**7.3%**	840	**GROW → 15%+**
Concentrates	$4,884	2.1%	130	Niche
Accessories + Other	$3,986	1.7%	194	—

Top Brands

Five brands account for 66% of total revenue. Zapacka is the volume engine with nearly 4,700 orders. Rove drives the highest revenue per order at $33.39.

Brand	Revenue	Share	Orders	AOV	Role
Zapacka	$45,464	**19.9%**	4,688	$9.70	Volume
Rove	$35,624	15.6%	1,067	$33.39	Margin
Adv. Cultivators	$17,394	7.6%	1,298	$13.40	Core
Breathe Free	$14,813	6.5%	742	$19.96	Core
Wyld	$14,693	6.4%	762	$19.28	Edibles

Customer Behavior

- **Peak Hours:** The 5–8 PM window drives 46% of all revenue. The single biggest hour is 8 PM (15.2% alone). Marketing pushes and staff scheduling should center on this window.
- **Day of Week:** Saturday leads at 15.8%, but sales are remarkably even across all seven days — no single day drops below 13%. This is healthy and suggests a consistent customer base.
- **Payment Methods:** Online ordering (Dutchie) accounts for 37.8% of revenue, followed by cash (34.1%) and debit (27.8%). Moving more volume to online ordering improves efficiency and enables better data capture.
- **Volume Drivers:** Eastie Rollz 1g pre-rolls moved 1,900 units — far and away the top item by volume. Zapacka Boca Seca (1,025 units) and Brrberry (933 units) pre-rolls follow. Pre-rolls are the foot traffic magnet.

3. Strategic Recommendations

Based on seven months of data and the current trajectory, here are the five highest-impact moves CH should make in 2026. These are in priority order.

1. Raise Average Order Value from $33 to $45

This is the single biggest lever. AOV has been stuck in the $29–$36 range for months. A $12 increase on 35 orders/day adds $420/day — that’s $12,600/month in new revenue with zero new customers.

- **Flight Kits:** Pre-bundled travel kits ($40/$75/$140) are the most natural AOV driver. Every traveler should be asked. Target: 4–6 kits sold per day by April.
- **Bundle Deals:** "Add a pre-roll for $5" or "Grab gummies for $8 with any flower purchase." Build simple, pre-priced upsells. These should be at the register and on Dutchie.
- **Staff Incentives:** Track AOV by budtender. Weekly bonus for highest AOV. Make it a friendly competition.

2. Push Edibles from 7% to 15% of Revenue

CH is leaving money on the table. Edibles are 7.3% of revenue versus the industry average of 15–20%. Wyld gummies are already the #1 edible brand — lean into it.

- **Shelf space:** Give edibles more prominent placement. Dedicate a "Gummy Wall" or traveler-friendly display near checkout.
- **Traveler angle:** Edibles are the easiest product for travelers (no smell, discreet, TSA-friendly). Every Flight Kit should include gummies.
- **Alpine campaigns:** Run a "Try Edibles" campaign targeting flower-only buyers. "First-time edible buyers get 20% off."

3. Own the 5–8 PM Window

Nearly half of all revenue happens in a 3-hour window. Instead of trying to grow slow hours, double down on what's already working.

- **"Happy Hour" promos:** 5–7 PM daily deals pushed via Alpine IQ at 4 PM. Create urgency and routine.
- **Staffing:** Best budtenders on the floor during peak hours. New hires should shadow evenings.
- **Online pre-orders:** Push Dutchie pre-ordering for the evening rush. "Order by 5, pick up by 6." Reduces wait times, increases throughput.

4. Move Online Ordering from 38% to 55%

Online customers spend more, come back more often, and give you their data. Dutchie is at 37.8% today. Weedmaps is essentially dead at 0.3%.

- **First-order incentive:** 15% off your first Dutchie order. Advertise this on every flyer, every in-store sign, every receipt.
- **Menu optimization:** Professional photos, updated descriptions, proper categorization. The Dutchie menu IS your storefront for online customers.
- **SMS/email nudges:** Alpine IQ campaigns targeting in-store-only buyers: "Order online, skip the wait."

5. Build a Repeat Customer Engine

The data doesn't show repeat purchase rates yet, but the infrastructure is ready. Alpine IQ automations + Flight Club loyalty can turn one-time buyers into regulars.

- **Welcome sequence:** 15% off next visit sent 1 hour after first purchase. The second visit is the most critical conversion.
- **Win-back:** 20% off to anyone who hasn't purchased in 30 days. Automate it and forget it.
- **Flight Club:** 1 point per $1 spent. Auto-sync, no app. "Join Flight Club" should be said to every customer.
- **Google Reviews:** Every happy customer is a review. Use Alpine post-purchase automation + QR cards at register. Target: 50 reviews by April, 150 by summer.

Projected Revenue Impact

If all five recommendations are executed, here's the estimated monthly upside based on current traffic levels:

Initiative	How It Adds Revenue	Monthly Upside
AOV $33 → $45	+$12/order × 35 orders/day	**+$12,600**
Edibles 7% → 15%	Higher-margin category shift	**+$3,000–$5,000**
Evening marketing push	Capture more of the peak window	**+$2,000–$4,000**
Online 38% → 55%	Higher AOV, better retention data	**+$1,500–$3,000**
Repeat customer engine	More visits per customer per month	**+$3,000–$6,000**
TOTAL POTENTIAL	Combined upside at full execution	**+$22K–$31K/mo**

This is why the current $35K/month baseline can realistically reach $55–$65K/month by summer with disciplined execution. No paid ads required.

4. The Growth Roadmap

A phased plan built on the data above. Each phase has clear focus areas, key actions, and measurable targets.

Phase 1: Foundation (February – March)

Lock in the basics. Launch the programs that are ready to go, fix what's broken, and build the data systems needed for smart decisions later.

Focus Area	Key Actions
AOV Growth	Launch Flight Kits (shelf, signage, staff training). Add pre-roll/gummy upsell combos at register. Track AOV by budtender.
Alpine IQ	Go live with welcome, win-back, birthday, and points reminder automations. Launch Flight Club loyalty. Send first weekly campaign.
Driver Program	Print 500 punch cards. Stock 10 Dunkin + 10 gas cards. Distribute at Uber/Lyft staging areas near Logan.
Flyering	Test 3 locations with unique codes (Logan, Maverick, Hotels). Track redemptions for 2 weeks, then scale winners.
Online Menu	Update Dutchie menu: photos, descriptions, categories. Add "Order Online" signage in-store and on flyers.

Target: $40–$42K/month by end of March. AOV from $33 to $37. 40+ orders/day.

Phase 2: Accelerate (April – June)

Programs are running. Now optimize, expand, and prepare for summer tourist season. This is also 4/20 month — the biggest sales event of the year.

Focus Area	Key Actions
4/20 Campaign	Plan a full 4/20 week (Apr 13–20). Flash deals, Flight Kit specials, loyalty point bonuses. This should be the biggest revenue week of the year.
Edibles Push	Expand Wyld selection. Add traveler-friendly display. Run "First Edible" campaign through Alpine. Include gummies in all Flight Kits.
SEO Foundation	Build landing pages: /dispensary-near-logan-airport/, /flight-kit/, /cannabis-for-travelers/. Fix technical SEO. Push Google Reviews hard.

Business Partners	Sign 10+ hotel/restaurant partners. Concierge gift cards for referrals. Monthly check-in and flyer restocks.
Content Kickoff	Begin social media content: TikTok/IG focused on travel + airport angle. 3–4 posts per week. Spotlight products and Flight Kits.

Target: $50–$55K/month by end of June. AOV at $40+. Online ordering above 45%. 50+ Google Reviews.

Phase 3: Peak Season (July – September)

Summer is Boston's highest tourist season. Logan Airport sees peak passenger volume. This is when the traveler strategy pays off the most.

Focus Area	Key Actions
Tourist Push	Maximize driver program, hotel partnerships, and airport flyering. Add Summer Flight Kit variant. Partner with airport shuttle services.
SEO + Content	Publish 2 blog posts/week. Target top 5 for "dispensary near Logan Airport." Build local backlinks. Hit 100+ Google Reviews.
Repeat Customers	Analyze Alpine data for repeat purchase rate. Run targeted loyalty campaigns. VIP tier for top 10% spenders.
Events + Community	Host in-store events (vendor days, product launches). Sponsor local Eastie events. Build community presence beyond delivery.

Target: $60–$65K/month at peak. 50+ orders/day. AOV at $42+. Online above 50%.

Phase 4: Optimize (October – December)

Harvest season. Lean into data, double down on top performers, and set up for a strong holiday finish (Green Wednesday, holiday gifting).

Focus Area	Key Actions
Data-Driven Cuts	Review all programs. Kill underperformers. Reallocate budget to highest-ROI channels. Trim slow-moving SKUs.
Holiday Campaigns	Green Wednesday (Nov 26) is the 2nd biggest day. Holiday gift kits, loyalty point bonuses, gift card promos. Plan 6 weeks out.
Retention Focus	By now you should have 6–9 months of Alpine data. Build cohort analysis. Identify at-risk customers. Run targeted win-back campaigns.
2027 Planning	Set budget and targets for next year. Evaluate paid media readiness. Assess staffing needs for growth. Consider second location feasibility.

Target: $55–$60K/month average. 150+ Google Reviews. Repeat customer rate above

35%. Full automation stack running.

5. Revenue Targets

Conservative and stretch projections based on current trajectory plus the roadmap actions above.

Quarter	Conservative	Stretch	Avg/Day	Orders/Day	AOV Target
Q1 (Jan–Mar)	$110K	$120K	$1,300	37	$37
Q2 (Apr–Jun)	$145K	$165K	$1,700	42	$40
Q3 (Jul–Sep)	$175K	$200K	$2,000	48	$42
Q4 (Oct–Dec)	$160K	$185K	$1,850	45	$42
FULL 2026	**$590K**	**$670K**	$1,700	43	$40+

These projections assume no paid advertising. Organic channels only. If content production and paid social are added in Phase 2, the stretch targets become realistic baselines.

Key Milestones

1. **$1,500/day consistently** — validates that Phase 1 programs are working (target: March)
2. **$2,000/day consistently** — confirms summer scaling is on track (target: July)
3. **50 orders/day** — volume threshold for considering additional staffing (target: June)
4. **AOV above $40** — Flight Kits and upsells are driving real results (target: May)
5. **100+ Google Reviews** — SEO competitive enough to rank page 1 (target: August)

6. Immediate Next Steps

To start Phase 1 immediately, these items need to be resolved in the next two weeks:

#	Action Item	Owner	Deadline
1	**Confirm Flight Kit pricing and products**	Brian + Randy	Week 1
2	**Grant Alpine IQ access**	Brian	Week 1
3	**Approve driver rewards budget (~$800/mo)**	Brian	Week 1
4	**Grant Dutchie / Weedmaps admin access**	Brian	Week 1
5	**Print punch cards + order gift cards**	Randy	Week 2
6	**Build Flight Kit shelf + signage**	CH team	Week 2
7	**Launch first Alpine IQ automations**	Randy	Week 2
8	**Begin flyer testing at 3 locations**	Brian + team	Week 2

Total startup investment: ~$1,200 one-time + ~$850/month for driver rewards restocking. Everything else is labor and time.

The numbers are moving. Let’s keep building.
