DECODED ⬜⬜ ROVIQ

DECODED × ROVIQ

“10,000 streetwear brands have a Shopify store. Nobody has a speakeasy.”

Prepared for: Decoded Shop
Prepared by: Roviq — Strategy, Data & Technology
Date: February 2026
Classification: Confidential

THE DIAGNOSIS

We audited every layer of Decoded’s digital presence. The findings were bad across the board.

Dimension	Grade	The Problem
Brand Identity	**6/10**	Strong DNA — “Decoded Noir,” automotive × faith × luxury aesthetic, evocative names (“Kingdom Has Fallen,” “Hand of God,” “Homeless Rich”). Two-tier architecture shows strategic thinking. But the story isn’t being told anywhere.
Digital Presence	**2/10**	No custom domain (still on `decodedshop.myshopify.com`). Zero product descriptions across 37+ SKUs. Default Shopify theme. No About page. No brand story. “Powered by Shopify” in the footer.
Marketing	**2/10**	Instagram-only brand. No TikTok — fatal for streetwear in 2026. No email/SMS capture. No content strategy. 0.27% engagement on 20.4K followers.
Revenue Infrastructure	**2/10**	AOV ~$68. No upsells, no bundles, no abandoned cart recovery. No email revenue ($0). No SMS revenue ($0).
Customer Experience	**2/10**	Zero reviews on any product. No size guide. No returns policy. One image per product. Asking people to spend $150 on faith alone.

The #1 Thing Killing Growth

No retention infrastructure. Every customer who buys is immediately lost. No email, no SMS, no push

notifications, no community, no reason to come back. The business model right now is: acquire a customer at full cost, sell them one item, never speak to them again. That's the most expensive way to run a DTC brand.

But here's what the audit also showed: **the brand DNA is real.** "Decoded Noir." "Hand of God." "Kingdom Has Fallen." The automotive × faith × luxury aesthetic. The two-tier pricing architecture. The 911 Turbo visual language. "806 The Show" as a cultural anchor. These aren't manufactured — and genuine brand identity is the one thing money can't buy.

The gap isn't identity. It's infrastructure.

THE VISION: THE DIGITAL SPEAKEASY

Most brands would fix the Shopify store, run some Meta ads, and call it a day.

We're not proposing that.

We're proposing that Decoded stop competing as a clothing brand and start operating as a **digital speakeasy** — an experience-first world where the app isn't a store, it's the front door to a culture. The clothes aren't products. They're trophies you earn by being inside.

The model: MSCHF built a $200M+ brand on one principle — every time you open the app, something different happens. You never know what you'll find. That creates compulsive engagement. People open the app not to buy, but to *see what's happening.* The buying follows naturally.

Decoded's frequent drops are the perfect fuel for this. Most brands struggle to create enough reasons for people to open their app. Decoded's owner drops constantly — that's not a weakness, it's the engine.

What this looks like in practice:

- A cinematic boot sequence that feels like starting a 911 Turbo
- Real arcade games hidden inside the app — not loyalty points, actual gameplay
- 15-minute "Flash Raid" drop windows that appear without warning
- Podcast episodes that contain verbal codes unlocking hidden app content
- Unsold inventory gets permanently vaulted — never sold again
- A tiered community where the deepest levels are earned, not bought

The website becomes a clean, dark, minimal storefront that exists to funnel people to the app. The app is where the world lives.

Nobody at Decoded's level has this. That's the point.

PHASE 1: STOP THE BLEEDING (Days 1–14)

While the app is being built, we fix the fires that are actively costing sales. None of this requires the app — it's about making sure the brand isn't sabotaging itself.

Action	Why
	Signals "hobby project." A custom domain

Custom domain — replace `decodedshop.myshopify.com`	costs $15/year. No excuse.
Product descriptions for all 37+ SKUs	Zero descriptions across the entire catalog. This alone is costing 50%+ of potential conversions.
Email/SMS capture — Klaviyo popup + welcome flow	DTC brands generate 30–40% of revenue from email/SMS. Decoded generates $0. Even basic flows add $30K–$75K/year.
About page — the founder's story IS the brand	Automotive roots, faith, why "Decoded," why "Noir." People buy from people.
Trust layer — size guide, returns policy, social links	Table stakes for selling $150 items. Remove "Powered by Shopify."
TikTok launch — dark, cinematic, 7–15 second loops	Not being on TikTok as a streetwear brand in 2026 is like not having a phone number in 2005. The Noir aesthetic is MADE for short-form video.
Hide sold-out SKUs and clean up dead inventory	Dead-end products waste attention.

Phase 1 Cost: Included in project scope. These are table-stakes fixes.

PHASE 2: THE APP — THE MAIN EVENT (Weeks 2–8)

This is what makes Decoded different from every other streetwear brand. Not a shopping app. Not a mobile website in a wrapper. A world.

The Cold Start: Cinematic Onboarding

When someone opens the app for the first time, they don't see a login form. They see a movie.

Screen 1 — THE IGNITION A 911 Turbo tachometer fills the screen. The needle climbs from 0 to redline. Engine audio fades in — low, throbbing, real. The Decoded logo burns into frame, letter by letter. Text: *"This isn't a store."*

Screen 2 — THE WORLD Split-screen montage: Porsche in motion / Noir Strata fabric close-up / hands in prayer / city night aerial. Quick cuts. Cinematic. Text: *"This is a world. You're either in it, or you're watching."*

Screen 3 — THE GATE A fingerprint scanner icon pulses. Hold it until the vault unlocks — heavy, physical-feeling. Then: "Choose Your Lane."

DECODED	DECODED NOIR
The main line. $25–$70.	The luxury tier. $120–$150.
"I'm here for the drops."	*"I'm here for the culture."*

This fork segments users instantly and validates the two-tier architecture in real time.

Screen 4 — ENTER THE CODE Dark input field. Blinking cursor. Label: *"Enter your code name."* Email capture below. CTA: **"DECODE."** Push notifications trigger after entry.

Why this matters: The first 10 seconds determine if someone keeps the app or deletes it. This isn't "create an account" — it's "enter the world."

App Screens (V1)

HOME — "THE DASHBOARD" Dynamic hero that changes with each drop. Next drop countdown timer. Hidden element: the Decoded logo pulses every 30 seconds — tap it to discover The Vault. Quick nav: Shop / Noir Lounge / Profile.

THE DROP ZONE Live drops with countdown timers. Flash Raid 15-minute surprise windows. Versus Drops — two colorways, users vote, loser gets locked forever. Noir-only early access (24-hour head start). App-exclusive drops (never on the website). Real-time stock meter showing true scarcity.

THE VAULT — Hidden Games - **"Midnight Run"** — top-down 2D racer. Blacked-out 911 Turbo dodging traffic on a dark highway. Score 5,000+ and the "Check Engine" light triggers access to a hidden product collection invisible to everyone else. - **"The Confessional"** — noir puzzle game. Answer questions drawn from "806 The Show" podcast lore and biblical references in the designs. Correct answers unlock flash discounts for one hour. - **Global leaderboard.** Top scorers earn badges, exclusive access, free pieces. - **"Driver's License"** — shareable scorecard graphic with your handle and score, designed for IG Stories. Users share them. Others see the app. Organic discovery loop.

SHOP Full Shopify catalog sync via Storefront API. Product pages with descriptions, multiple images, size guide. Cart + Shopify checkout. Real-time inventory sync across app and website.

NOIR LOUNGE — VIP Section Noir-exclusive content: design process, fabric sourcing, founder notes. Noir-only drops and colorways. Quarterly founder Q&A events. Membership tier display and progress.

PROFILE — "MY DECODED" Order history. Membership tier + status. Game stats + earned rewards. Referral code + invite tracking. Push notification preferences.

Drop Architecture

Every drop follows a structured cadence that turns frequent releases into events:

THE STANDARD DROP

```
T-72h:  Push — "Something's coming." Blurred teaser on home screen.
        Noir members get the unblurred preview.
T-1h:   Push — "1 hour." App enters Drop Mode. Live viewer count.
T-0:    Push — "IT'S LIVE. GO." Product pages unlock.
        10-minute cart timer creates urgency.
T+24h:  Push to non-buyers: "You missed it. [X] pieces left."
        Sold out? "Gone. Next one in [X] days."
```

THE FLASH RAID No warning. Push hits: *"THE WINDOW IS OPEN. 15 MINUTES."* When the countdown ends, the Buy button detonates and the product vanishes. Miss it, it's gone.

THE VERSUS DROP Two colorways drop simultaneously. Users vote by tapping their side. After 24 hours, the loser gets locked — permanently unavailable. Forces tribalism. Generates organic debate on social.

THE VAULT LOCK If a drop doesn't sell out within 48 hours, remaining inventory gets permanently pulled. A cinematic "vault sealing" animation plays as the pieces disappear. *"If you didn't grab it, it's gone forever."* Every drop feels urgent because the alternative isn't a sale — it's permanent removal.

APP-EXCLUSIVE DROPS 1–2 per quarter, available ONLY in the app. When followers see “APP ONLY” on Instagram, they download. This is the #1 driver for installs.

Podcast Integration: The Cross-Platform Flywheel

“806 The Show” is an untapped engagement engine.

- **Verbal codes:** During episodes, the host drops a code word (e.g., *“Romans 12:2”*). Entering it in the app triggers a hidden discount or exclusive product for a limited time.
- **“The Confessional” game** draws questions from podcast lore — app users have to listen, listeners have to download the app.
- **Episode drop sync:** Drops teased at the end of episodes. *“The code is live in the app for the next hour.”*

Closed loop. Podcast feeds app downloads. App feeds podcast listens. Both feed purchases.

Surprise Mechanics

THE NOIR FLASH SALE — Once per week, 10 minutes, no warning. Select Noir items flash at 20–30% off. Push fires: *“NOIR FLASH. 10 MINUTES.”* Creates compulsive app-checking.

HIDDEN CONTENT — Certain products only discoverable through exploration. Tap the right element, enter the right code, score high enough. Rewards the obsessive fans.

Community Tiers

Tier	Access	How You Get In
DECODED (Free)	Shop, drops, basic games, push notifications	Download the app
NOIR ($15/mo or auto at $300 lifetime spend)	24-hour early access to ALL drops. Noir Lounge. Noir-only drops. Free shipping. Birthday drop. Founder Q&A.	Subscribe or spend $300+
ELITE (Top 1% — earned)	Vote on next colorway. Input on drop names. Ultra-limited “Elite” product line (10–20 units). Direct founder access. Name in app credits.	Top game scorers + highest lifetime spend. Invitation only.

PHASE 3: LAUNCH & GROWTH (Weeks 8–12)

App Launch Campaign

Week 1 — The Tease: Instagram Stories: daily 3-second clips of app screens. Dark. Moody. No explanation. Just *“Coming.”* TikTok: 15-second cinematic trailer — engine sound, app screens, game footage. Podcast: episode dedicated to the app, first verbal code dropped. Email blast: *“You’re getting early access. No one else.”*

Week 2 — The Drop: Launch day: simultaneous app-exclusive drop. First product in the app available NOWHERE ELSE. Instagram Reel: screen-record of the full onboarding experience. Authentic. Real. Live

download counter on Stories. Push to Day 1 users: *"The first drop is live. You're the first to see it."*

Target: 300–600 installs in Month 1. At 500 installs with 15–25% install-to-purchase conversion = 75–125 first-month orders through the app.

Instagram → App Funnel

Tactic	Mechanic
Bio link	Swap Shopify link for app download. The app IS the store.
"APP ONLY" drops	Product teasers on IG with "APP ONLY" watermark. Curiosity drives downloads.
Vault leaderboard	"Top scorer this week wins a free Noir piece." Competitive energy.
Hidden codes in posts	4-digit code hidden in an IG image → enter in app for surprise.
Driver's License shares	Game scorecards designed for Stories. Organic discovery loop.

Paid Acquisition (Month 3+ — only after the app proves it converts)

Channel	Budget	Creative
Meta App Install Ads	$1,500/mo	Cinematic 15s app trailer. 18–34, streetwear + car culture.
TikTok App Install Ads	$750/mo	UGC: "I found a hidden game inside a streetwear app."
Retargeting	$500/mo	Website visitors + IG engagers → app install CTA.

Expected CPI: $2–$5. At $68 AOV and 15–25% conversion, break-even on first purchase.

LONG-TERM VISION

By Month 6: **60% of revenue through the app.** The website becomes a front window for SEO. Instagram becomes the megaphone. The app drives conversion and retention.

The data advantage: The app generates intelligence the website never could — push notification open rates by product type, game engagement by time of day, Noir vs. free tier purchase rates, at-risk user identification. Every drop decision informed by real behavior.

The moat: Game scores, Noir status, earned rewards, referral networks, purchase history — moving to another brand means starting from zero. "I'm Decoded Elite" becomes identity. No competitor can buy that.

Future expansions: Vault Game Season 2 ($2K), Android version ($4–6K), NFC physical "Black Card" artifacts for Elite tier ($1.5K), AR virtual try-on ($3K), community challenges, quarterly subscription boxes bridging digital and physical.

WHAT TO STOP DOING

Stop This	Why
Treating the Shopify store as the brand	The store is infrastructure. The app is the brand.
Posting flat-lay product photos on white backgrounds	Looks like a dropshipping store. Shoot on concrete, on cars, on people, at night.
Dropping without a campaign	Every drop without a tease, countdown, and follow-up is just a restock.
Keeping 40 SKUs permanently available	Constant availability kills scarcity. 20% core basics always available + 80% rotating limited drops.
Ignoring TikTok	The Noir aesthetic is MADE for short-form video.
Selling without product descriptions	Zero descriptions = 50%+ lost conversions.
Operating on .myshopify.com	$15/year for a custom domain. No excuse.

PRICING

No ranges. Firm numbers.

V1 Build — $8,500 (One-Time)

Component	What's Included
Website Triage	Custom domain, dark luxury theme, all product descriptions, About page, size guide, returns policy, email capture, "Get the App" funnel
Cinematic Onboarding	Tachometer boot sequence, fingerprint gate, "Choose Your Lane" fork, code name entry, push opt-in
Home Screen	Dynamic hero, drop countdown, hidden Vault entry
Drop Zone	Live drops, Flash Raids, Versus Drops, Noir early access, real-time stock display
The Vault	"Midnight Run" racer + "The Confessional" puzzle game. Leaderboard. Driver's License scorecard.
Shop	Full Shopify sync. Product pages. Cart. Checkout. Real-time inventory.
Noir Lounge	VIP content. Noir-only drops. Tier display.
Profile	Order history. Tier + status. Game stats. Referral code. Notifications.
	Full drop cadence (72h → 1h → live → post). Flash Raids. Noir Flashes.

Push System	Segmented by tier.
Backend	Firebase/Supabase for users, scores, memberships. Node.js for game logic + notifications.
App Store Submission	iOS App Store. Screenshots, metadata, privacy policy, review buffer.

Timeline: 8 weeks from kickoff to App Store submission.

Payment: 50% upfront ($4,250) / 50% on submission ($4,250).

Monthly Retainer — $2,500/month

Deliverable	Details
Drop Campaigns	Full push sequences for every drop type. Campaign templates executed.
Push Strategy	Copy, segmentation, scheduling, A/B testing. 8–12 pushes/month.
App Content	Hero updates per drop. Noir Lounge publishing. Drop Zone management.
Game Management	Leaderboards. Reward coordination. Quarterly rotation planning.
Podcast Sync	Programming verbal code unlocks for each episode.
Analytics	Monthly report: installs, DAU/MAU, push performance, conversion, game engagement, Noir growth.
Social Strategy	Content calendar. Templates + copy for 3–4 IG posts/week. TikTok direction.
Maintenance	Bug fixes, minor features, Shopify sync, OS compatibility.
Strategy Call	30 minutes monthly. Metrics, drop planning, roadmap.

Commitment: 3 months minimum. Month-to-month after.

Total Year 1 Investment

Item	Cost
V1 App Build	$8,500
Monthly Retainer (12 months)	$30,000
Total	**$38,500**

Projected Year 1 Revenue Generated

Channel	Projected Revenue
Email/SMS flows (Klaviyo)	$15,000–$30,000

App-driven sales (push + drops)	$40,000–$80,000
Noir membership (30 members × $15/mo × 12)	$5,400+
Conservative Total	**$60,000–$115,000**

The investment pays for itself within the first two quarters.

WHY ROVIQ

We've built this before. Randy built the AC Blacksite app — cinematic onboarding, hidden Space Invaders game, premium native UX. This isn't a concept from a team that's never shipped. It's a proven playbook adapted for Decoded.

We understand the culture. We understand why MSCHF works, why Corteiz does scavenger hunts, why Hellstar's founder story is more valuable than their product line. Streetwear isn't about clothes — it's about identity, scarcity, and belonging. This app isn't a shopping cart with a game bolted on. It's a world built on those principles.

One team. No handoffs. Strategy, design, and technology under one roof. We design the experience, build the app, launch the campaigns, read the analytics, and iterate. One partner. One vision.

We win when Decoded wins. The retainer means we're in the war room for every drop, optimizing every push, watching every metric. When the app drives its first $50K quarter, that's our win too.

NEXT STEPS

One action: Schedule a 30-minute call to walk through this, answer questions, and align on kickoff.

Upon agreement: 1. Roviq sends SOW + invoice for 50% deposit ($4,250) 2. Website triage begins Day 1 3. App development begins Day 3 4. First milestone check-in: end of Week 2

10,000 streetwear brands have a Shopify store. Nobody has a speakeasy. Let's build yours.

Roviq — Strategy. Data. Technology.
